

Please circle any condition(s) presently causing you concern.

General

Headache
Loss of sleep
Numbness
Tingling
Night pain

Ears/Eyes/Throat

Blurred vision
Double vision
Vertigo/dizziness
Difficulty swallowing
difficulty hearing

Respiratory

Chronic cough
Pain on breathing in or out
Shortness of breath
Bloody sputum

Cardiovascular

Heart murmur
Heart condition
High blood pressure
Stroke History
Clotting disorder
Varicose veins
Deep vein thrombosis

Stomach/Bowel

Indigestion
Nausea/vomiting
Constipation
Ulcers
Gastric reflux
Hiatal hernia
Colitis/Crohn's

Genitourinary

Pregnant Y/N
Ovarian cysts
Uterine fibroids
Painful menstruation
Recent UTI
Blood in urine
Prostate/Hernia issues

Have you ever/currently been on birth control? Y N

Have you or are you presently taking Coumadin or warafin? Y N

Are you a smoker? Y N Type, Duration and how many per day?

Have you been told you have cancer? Y N Where & When?

Have you ever tested positive for HIV? Y N Tested positive for AIDS? Y N

Have you been diagnosed with either Hepatitis A, B or C? Y N

Have you recently been in a car accident? Sport/Recreational Accident? Describe:

Please list any medications you are presently taking:

Please list any prior/pending surgical history or medical conditions:

CANADIAN CHIROPRACTIC PROTECTIVE ASSOCIATION

Informed Consent to Chiropractic Treatment FORM L

There are risks and possible risks associated with manual therapy techniques used by doctors of chiropractic. In particular you should note:

- a) While rare, some patients may experience short term aggravation of symptoms or muscle and ligament strains or sprains as a result of manual therapy techniques. Although uncommon, rib fractures have also been known to occur following certain manual therapy procedures;
- b) There are reported cases of stroke associated with visits to medical doctors and chiropractors. Research and scientific evidence does not establish a cause and effect relationship between chiropractic treatment and the occurrence of stroke. Recent studies suggest that patients may be consulting medical doctors and chiropractors when they are in the early stages of a stroke. In essence, there is a stroke already in progress. However, you are being informed of this reported association because a stroke may cause serious neurological impairment or even death. The possibility of such injuries occurring in association with upper cervical adjustment is extremely remote;
- c) There are rare reported cases of disc injuries identified following cervical and lumbar spinal adjustment, although no scientific evidence has demonstrated such injuries are caused, or may be caused, by spinal adjustments or other chiropractic treatment;
- d) There are infrequent reported cases of burns or skin irritation in association with the use of some types of electrical therapy offered by some doctors of chiropractic.

I acknowledge I have read this consent and I have discussed, or have been offered the opportunity to discuss, with my chiropractor the nature and purpose of chiropractic treatment in general, (including spinal adjustment), the treatment options and recommendations for my condition, and the contents of this Consent.

I consent to the chiropractic treatment recommended to me by my chiropractor including any recommended spinal adjustments.

I intend this consent to apply to all my present and future chiropractic care.

Dated this _____ day of _____, 20_____.
